Subject: Re: missing data

SDMS Document ID

2040214

Dear Adrian,

In response to your inquiries, we do not use an internal sample tracking system since our facility is considered a secured access facility. Instrument blanks are designated ICB and CCB. Preparation blanks are designated MB (method blank). The LCS for waters (rinse blanks) is designated SB (spiked blank). I will include the additional raw data for the MDLs, dilution factors, IECs and the standards prep log in each data package. I will send additional raw data packages for those we have already issued. The reagent ID from the raw data indicates reagents prepared daily as well as those that are used for a period of time. We prepare ICP Trace cal stds and ICV/CCV daily. Since we have no way of getting this daily info to you, I have included a sample of the reagent log for these. The sources of these solutions are the same each day. I will make sure you get the sample receipt notices that you are missing as well as those in future data packages.

I will be delivering data packages and EDDs today.

SB = LCS

*waters only for this job*
